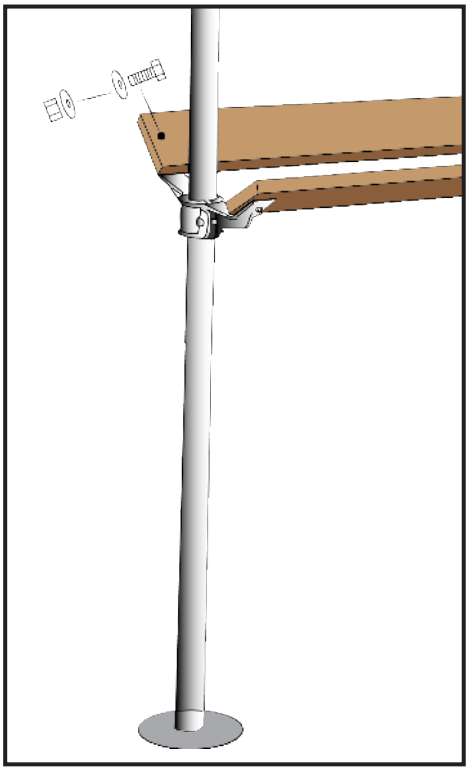
WB BRACKETS

MULTIPURPOSE RACK BRACKETS
FIRE HOSE, TIRES, WHEELS, ETC

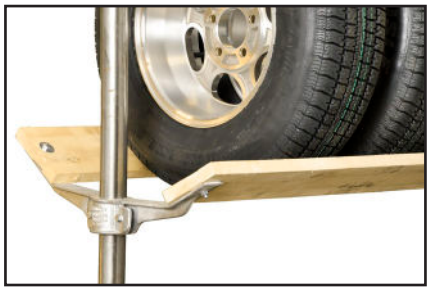
Few shops and warehouses have all the room they need for good housekeeping. WB Brackets help solve strorage problems by allowing easy access to large itmes in limited storage space.

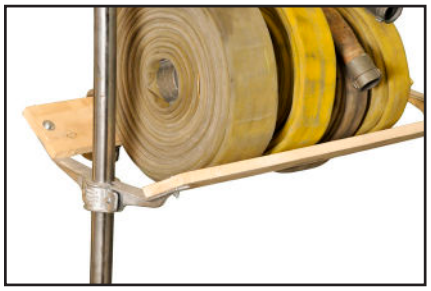
Build custom racks to fit your particular needs with (2) 2x6s for stringers. Take full advantage of the space available and create ample room for inspections and inventory.

BUILD YOUR OWN RACKS



Bolt bracket to 1 1/2" or 2" pipe (depending on if you have the small or large bracket). Run supplied nuts (3/8"x16) and bolts (3/8"x16x1 3/4") to the pipe firmly.

Secure 2x6 stringers to brackets with a 3/8"x16x2 3/4" bolt, (2) 3/8" flat washers and a 3/8"x16 nylock nut. See image left Do not exceed 5 feet between brackets.




Racks can easily be adjusted up and down pipe for custom heights. Do not exceed 250 lbs on any section due to the strength of 2x6 stringers.
