

# BATTERY-POWERED CHAINSAW CONVERSION KIT

Super Vac's all-new Chainsaw Conversion Kit turns an ordinary 20" wood-cutting DeWalt battery-powered chainsaw into the perfect RIT or overhaul saw for firefighter operations. Typically, battery-powered chainsaws are only ideal for cutting wood, but this kit equips the saw with a carbide-tipped chain capable of cutting through asphalt shingles, hurricane glass, roofing materials and more.\*

**2-YEAR  
COMPONENT  
WARRANTY**

\* Heavier construction materials may cause chain wear.

## Kit Components

- 1 Carbide-Tipped Chain:** Converts select battery-powered chain saws into a light-duty rescue saw capable of cutting through asphalt shingles, hurricane glass, roofing materials and more; easily sharpens with diamond equipment
- 2 Modified Bar:** Allows the wider chain gauge to operate with added room, putting less strain on the saw for repeat use; the bar is slotted to work with Super Vac's Quick Silver depth gauge
- 3 Optional Quick Silver Depth Gauge:** Prevents the blade from cutting too deep during roof ventilation

## 20" Bar

Component / Model No.	Weight	Materials	Battery-Powered Saw Compatibility
Chain / SV375-20 	11 oz 312 g	Chisel chain; carbide tipped (super grade for better impact resistance); loop for 20" bar, 3/8 x .050; single-raker design	DeWalt FLEXVOLT Battery-Powered Chainsaw
Bar / SV530-20 	33 oz 936 g	Flame-hardened rails to 60 Rockwell C; precision-honed groove and replaceable roller nose for smoother operation/longer life	
Depth Gauge (Optional) / SV780-20 	15.8 oz 448 g	Billet aluminum for lightweight strength; CNC machined for precision; open design prevents clogging of debris	
Depth Gauge (Optional) / SV789-20 	See weights above	For the most economical package, consider the complete kit, which includes the chain, bar and depth gauge components (above).
