

## MOUNTING ACCESSORIES For Smoke Ejectors

### Door Bar / Hanger

Super Vac's Hanger allows crews to hang a smoke ejector (or battery fan) most anywhere (from ladders, doorways, windows, archways and more). Used with the Door Bar, which deploys easily with a quick-release pull trigger, the fan can be placed at most any height.

The Extension Bar comes standard. Each can be purchased separately.

Model	Pairs With	
HR	All Smoke Ejectors / Battery Fans	
Model	Weight	Usable Range
DOOR BAR	13 lbs 6 kg	26"- 60" with extensions

### Tilt Frame

The Tilt Stand Frame is perfect for elevating the fan's airstream (positioned in 18-degree increments for blowing straight up or down). The robust design and wide stance prevents tipping while providing quick setup and effortless tilt. This frame can be built with additional cord length (10' standard).

Model	Pairs With	Cord Length	Weight
TF-16	16" Smoke Ejector	10'	42 lbs 19 kg

### Running Board Mount

These mounts allow you to carry a Super Vac Smoke Ejector on your vehicle running board for quick access.

Model	Pairs With
RBM-SE	All Smoke Ejectors

Please specify fan model when ordering.
